Poorten • Portes de garage

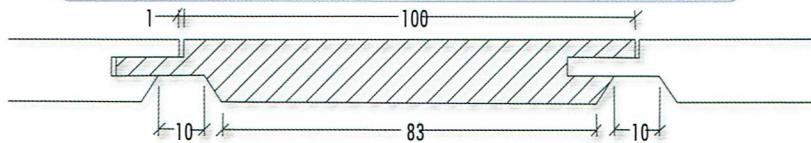

In het gamma van de garagepoorten is er ruime keuze uit verschillende uitvoeringen. Zowel op basis van de massieve kantelpoorten met ROB-systeem als op basis van de metalen kaders van Hormann, wordt een bekleding aangebracht die inspeelt op de stijl van de woning en het bijhorende buitenschrijnwerk. Daarnaast brengen de dubbele naar buiten opendraaiende poorten de sfeer van weleer terug.

Dans la gamme des portes de garage, vous pouvez choisir dans différentes exécutions. Aussi bien sur base des cadres massifs avec quincaillerie à contrepoids ou à ressorts ROB, que sur base des cadres métalliques Hormann, un habillage qui correspond avec le style de la maison et le reste de la menuiserie extérieure, peut être appliquée. En plus des portes basculantes, les portes à deux ouvrants vers l'extérieur, nous rappellent l'atmosphère des temps anciens.

Standaard zijn alle deuren zowel in hout, PVC of ALU, uitgerust met een hoogwaardige meerpunts-sluiting.

Afhankelijk van de wensen van de klant kunnen deze desgevallend worden aangepast met inbraakwerende sluitingen, aangevuld met veiligheidscylinder en -rosace, die uiteraard beantwoorden aan de huidige van kracht zijnde normering inzake inbraakweerstand.

Toutes les portes en bois, PVC ou ALU sont prévues de base d'une serrure multi-points.

En fonction des désirs du client, ces serrures peuvent être remplacées par des serrures anti-effraction, complétée avec des cylindres et des rosaces de sécurité, qui répondent aux dernières normes au niveau de résistance à l'effraction.

- A. Standaard 5-puntslot voor houten deur.
Serrure standard 5 points pour porte bois.
